

Noise Abatement Update – August 20, 2025

Earlier this week, we met with city bylaw officials at The Clemow to discuss potential options for sound abatement. While our property continues to operate within all required compliance standards, we understand the importance of addressing community concerns and want to ensure we remain a good neighbour.

To that end, we are working with a sound consultant to carefully assess the city's input. Following this review, our structural engineer will prepare a detailed installation plan. Once the plan is complete, it will be submitted to the city for approval. Upon receiving the required permissions, our team will move forward with sourcing materials and scheduling the installation.

We value the dialogue with city officials and residents alike, and we remain committed to ensuring that the selected product and approach are both technically sound and effective. We will continue to provide updates on this page as progress is made.

We thank nearby residents for their feedback and ongoing patience as we work through this process responsibly and collaboratively.
